

MEDIA RELEASE

31st May 2012

UK Biomethane Day 2012
26th June 2012 | National Motorcycle Museum | Birmingham

CNG Services Ltd (CSL), in association with the REA, are pleased to announce the first UK Biomethane Day to be held at the Motorcycle Museum in Birmingham on Tuesday 26th June 2012. This one day event will be of interest to anyone considering this new and exciting market as well as to those who already have projects underway.

This event is staged as part of the Green Gas Grids Project which is a pan European collaboration aimed at promoting the benefits of biomethane injection. The purpose of the day is to receive a detailed briefing in relation to biomethane injection. Attendees will receive a briefing pack and have chance to meet representatives of the gas distribution networks and the suppliers who they can work with in order to become part of the new biomethane economy.

Producers, manufacturers and gas consumers will all benefit from the programme explaining the latest developments in the sector, overviews of the market and information regarding the practical steps to be taken in order to inject Biomethane to the grid.

In addition, the new, not-for-profit Green Gas Certification Scheme has been created to provide simple elimination of double-counting of registered gas, ensuring authenticity and certainty for suppliers and consumers of biomethane will be introduced and explained.

More information on the UK Biomethane Day 2012 is available via the following link: www.cngservices.co.uk/events and an overview of the Green Gas Certification Scheme is available here: www.cngservices.co.uk/green-gas-certification-scheme

About CNG Services Ltd

CNG Services Ltd ("CSL") supports the development of new anaerobic digester projects including a range of utilisation options for the biogas:

- Use to generate electricity in "good quality" CHP
- Clean-up of biogas to produce biomethane
- Injection of biomethane into the gas grid
- Use of compressed biomethane as a vehicle fuel
