

Maximising the value of your biomethane assets **with SmartestEnergy**

The energy landscape is changing and there is an important role for biomethane assets to play in the EU net zero transition. With that, there are commercial opportunities for producers to take advantage of.

As one of the UK's leading offtakers of biomethane and RGGOs, we offer competitive, long term agreements and bespoke pricing options to help you maximise revenues and manage risk.

SmartestEnergy can add value to your biomethane assets

Established and experienced offtaker (including RGGOs)

Established in 2001, we are experienced in purchasing RGGO in the UK with 1.25TWh in the past year, including long term partnerships with multiple producers.

Competitive agreements for tailored periods

We offer competitive biomethane offtake agreements with flexible and attractive payment options, guaranteed volumes, and tailored contract terms to meet your specific needs.

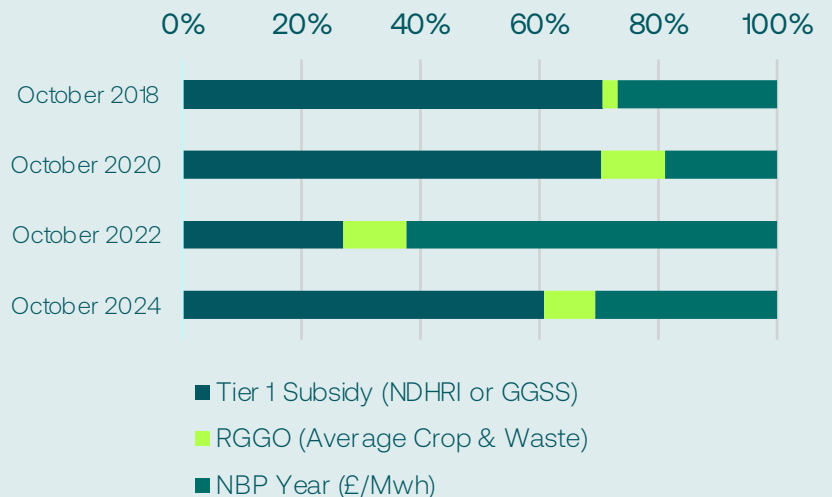

Hedge multi-year production

We provide fully fixed or partially fixed prices on RGGOs to help reduce risks in price volatility and provide long term revenue stability for up to 5 years.

Revenue Composition of AD Plants by Registration Date

In the past 6 years, RGGOs are becoming an increasing proportion of a producer's revenue stream. With this in mind, getting the best price for your certificates is now more important than ever.

* Estimates by SmartestEnergy based on 1 year contract out of October

SmartestEnergy is a people-powered energy company built on strong relationships and two decades of trading expertise.

We're the UK's leading purchaser of independently generated renewable energy and a licensed supplier. This gives us valuable experience in providing commercial agreements across many different sectors.

We've been shaping the energy landscape in the UK since 2001 and over the last few years we've opened offices in the United States and Australia. With the financial strength and innovation of our parent company, the Marubeni Corporation, we are a stable and well-resourced independent energy company.
